

Handheld Scanners

Z-3080

Handheld CCD Contact Scanner

Features

- **Light, rugged design**
 - Durable construction ensures long service life
- **Advanced scanning performance**
 - 2,048 pixels CCD with ZEBEX newly designed scan engine and wide scan window enables superior first read rate success
- **Read status LED indicator and programmable beeper**
 - Allows the user to recognize scan status at a glance
- **Built-in decoder**
 - Allows automatic recognition and decoding of the most popular barcodes
- **Multi-interface communication**
 - RS-232C, USB, wand and keyboard emulation interface
- **Multiple mounting configurations**
 - Can be mounted on either vertical or flat surfaces

Applications

Point-of-sale
Stock control
Logistics tracking
Document tracking
Shipping/receiving

The Z-3080 scanner delivers advanced scanning performance at a competitive price. Designed with a lightweight, rugged housing, the Z-3080 ensures reliability in the field. This contact scanner is ergonomically designed for both left and right-handed users, plus features a quick disconnect cable design that is field replaceable.

The Z-3080 offers advanced scanning performance with its 2,048 pixels CCD, wide scan window, and a newly designed ZEBEX scan engine. Scanning speed of up to 100 scans per second are possible with the Z-3080, and its built-in decoding capabilities ensure recognition of the majority of barcodes in existence. Its handy read status LED and programmable beep give users both audio and visual cues about scan status, further increase accuracy and efficiency. The Z-3080 can also communicate via a number of popular interfaces, including RS-232C, wand, keyboard emulation, and USB.

With a strong mix of features, price and performance, the Z-3080 is currently being used in thousands of industrial and manufacturing locations.
